**PERMISSION FOR TREATMENT**

I hereby grant permission to York College, or its authorized providers, which may include student nurses, nurse practitioner students, physician assistant students, medical students, residents, as well as nurse practitioners and physicians, to furnish such medical care as my son/daughter/self may require, including examination, treatment, immunizations, etc. This permission is conditioned upon the understanding that in the event of serious illness or the need for hospitalization and/or major surgery, the College will use all reasonable efforts to contact my emergency contact. Failure in such efforts, however, should not prevent the College from providing such emergency treatment and exchange of records as may be necessary by an off-site provider.

***We ask that the student verify with their parents, and/or with their insurance company, participating hospitals, laboratories, and physicians in the York College area in case treatment and/or service are needed outside of YCP Health Services.***

***If this information is not known at the time of visit or unable to be obtained, we will send the student to the nearest facility located to YCP.***

***In the event that payment for services by an outside provider is denied by your insurance company, we ask that the student or guarantor accept financial responsibility and not hold YCP Health Services responsible for expenses incurred under these conditions.***

***Having read the above statements signifies that I understand the contents and agree to be responsible for this information and any expenses incurred.***

**Part I. Tuberculosis (TB) Screening Questionnaire** (to be completed by incoming students)

Please answer the following questions:

Have you ever had close contact with persons known or suspected to have active TB disease?  Yes  NoWere you born in one of the countries or territories listed below that have a high incidence of active TB disease? (If yes, please CIRCLE the country, below)  Yes  No

Afghanistan	Congo	Iran (Islamic Republic of)	Namibia	Singapore
Algeria	Côte d'Ivoire	Iraq	Nauru	Solomon Islands
Angola	Democratic People's Republic of	Kazakhstan	Nepal	Somalia South Africa
Anguilla	Korea	Kenya	Nicaragua	South Sudan
Argentina	Democratic Republic of the	Kiribati	Niger	Sri Lanka
Armenia	Congo	Kuwait	Nigeria	Sudan
Azerbaijan	Djibouti	Kyrgyzstan	Northern Mariana	Suriname
Bangladesh	Dominican Republic	Lao People's Democratic	Islands	Swaziland
		Republic		
Belarus	Ecuador	Latvia	Pakistan	Tajikistan
Belize	El Salvador	Lesotho	Palau	Thailand
Benin	Equatorial Guinea	Liberia	Panama	Timor-Leste
Bhutan	Eritrea	Libya	Papua New Guinea	Togo
Bolivia (Plurinational State of)	Estonia	Lithuania	Paraguay	Trinidad and Tobago
Bosnia and Herzegovina	Ethiopia	Madagascar	Peru	Tunisia
Botswana	Fiji	Malawi	Philippines	Turkmenistan
Brazil	French Polynesia	Malaysia	Poland	Tuvalu
Brunei Darussalam	Gabon	Maldives	Portugal	Uganda
Bulgaria	Gambia	Mali	Qatar	Ukraine
Burkina Faso	Georgia	Marshall Islands	Republic of Korea	United Republic of
Burundi	Ghana	Mauritania	Republic of Moldova	Tanzania
Cabo Verde	Greenland	Mauritius	Romania	Uruguay
Cambodia	Guam	Mexico	Russian Federation	Uzbekistan
Cameroon	Guatemala	Micronesia (Federated States	Rwanda	Vanuatu
Central African Republic	Guinea	of)	Saint Vincent and the	Venezuela (Bolivarian
Chad	Guinea-Bissau	Mongolia	Grenadines	Republic of)
China	Guyana	Montenegro	Sao Tome and Principe	Viet Nam
China, Hong Kong SAR	Haiti	Morocco	Senegal	Yemen
China, Macao SAR	Honduras	Mozambique	Serbia	Zambia
Colombia	India	Myanmar	Seychelles	Zimbabwe
Comoros	Indonesia		Sierra Leone	

Source: World Health Organization Global Health Observatory, Tuberculosis Incidence 2014. Countries with incidence rates of  $\geq 20$  cases per 100,000 population. For future updates, refer to <http://www.who.int/tb/country/en/>.

Have you had frequent or prolonged visits\* to one or more of the countries or territories listed above with a high prevalence of TB disease? (If yes, CHECK the countries or territories, above)  Yes  NoHave you been a resident and/or employee of high-risk congregate settings (e.g., correctional facilities, long-term care facilities, and homeless shelters)?  Yes  NoHave you been a volunteer or health care worker who served clients who are at increased risk for active TB disease?  Yes  NoHave you ever been a member of any of the following groups that may have an increased incidence of latent *M. tuberculosis* infection or active TB disease: medically underserved, low-income, or abusing drugs or alcohol?  Yes  No

If the answer is YES to any of the above questions, York College of Pennsylvania requires that you receive TB testing as soon as possible but at least prior to the start of the subsequent semester).

If the answer to all of the above questions is NO, no further testing or further action is required.

\* The significance of the travel exposure should be discussed with a health care provider and evaluated.

**Part II. Clinical Assessment by Health Care Provider**

Clinicians should review and verify the information in Part I. Persons answering YES to **any** of the questions in Part I are candidates for either Mantoux tuberculin skin test (TST) **or** Interferon Gamma Release Assay (IGRA), unless a previous positive test has been documented.

History of a positive TB skin test or IGRA blood test? (If yes, document below) Yes \_\_\_\_\_ No \_\_\_\_\_

History of BCG vaccination? (If yes, consider IGRA if possible.) Yes \_\_\_\_\_ No \_\_\_\_\_

**Tuberculin Skin Test : Date placed** \_\_\_\_\_ **Date read** \_\_\_\_\_ **Results** \_\_\_\_\_ **mm**

\*\*Interpretation: positive \_\_\_\_\_ negative \_\_\_\_\_

**OR Quanti-FERON Test: Results: Positive ( ) Negative ( )**

**\*\*Interpretation guidelines****>5 mm is positive:**

- Recent close contacts of an individual with infectious TB
- persons with fibrotic changes on a prior chest x-ray, consistent with past TB disease
- organ transplant recipients and other immunosuppressed persons (including receiving equivalent of >15 mg/d of prednisone for >1 month.)
- HIV-infected persons

**>10 mm is positive:**

- recent arrivals to the U.S. (<5 years) from high prevalence areas or who resided in one for a significant\* amount of time
- injection drug users
- mycobacteriology laboratory personnel
- residents, employees, or volunteers in high-risk congregate settings
- persons with medical conditions that increase the risk of progression to TB disease including silicosis, diabetes mellitus, chronic renal failure, certain types of cancer (leukemias and lymphomas, cancers of the head, neck, or lung), gastrectomy or jejunioileal bypass and weight loss of at least 10% below ideal body weight.

**>15 mm is positive:**

- persons with no known risk factors for TB who, except for certain testing programs required by law or regulation, would otherwise not be tested.

***If tuberculin skin test is POSITIVE, a Quanti-FERON Test is required to rule out latent tuberculosis infection:***

***Quanti-FERON Test Results: Positive ( ) Negative ( )***
