Study Abroad can be an enriching and eye-opening experience where learning extends well beyond the classroom walls. A student who is receptive to new cultural experiences and interested in broadening his or her horizons should consider such an opportunity. Study Abroad requires a mature level of personal commitment and responsibility, independence, attention to detail, and acceptance of new and different ways of living. If you bring these qualities to studying abroad, the experience will be an invaluable one.

**BENEFITS OF STUDY ABROAD**

**Academic Commitment & Career Development**
The experience of learning in a new and different academic environment results not only in enhanced interest in academic study, but also influences subsequent educational experiences. Students return from study abroad with a reinforced commitment to foreign language study and develop or enhance their intercultural competencies and skills. These skills are valued by both employers and professional/graduate schools and include cross-cultural communication skills, analytical skills, an understanding of cultural contexts, flexibility, resilience, and the ability to deal constructively with differences.

**Personal Growth**
Perhaps the most commonly cited benefit of study abroad centers around self-awareness and identity. These areas of personal growth include increased self-confidence, maturity, and intercultural development. The experience of being a ‘foreigner’ results in knowledge of how another culture approaches everyday tasks and challenges, which in turn develops a broader understanding of the US personally and globally.

**ADDITIONAL RESOURCES & HINTS**

**Office of Student Diversity and Inclusion**
This office provides educational and social programs related to diversity, multicultural affairs and cultural awareness for the student body, leading to the holistic development of students. The office also works closely with all students in their transition to York College.

**Study Abroad Information & Resources**
Students interested in study abroad should attend the Global Education Fair in the fall, Around the World in the spring, and/or a Study Abroad Information Sessions offered by the Study Abroad Center regularly throughout the academic year. These sessions are the best place to start the study abroad research and selection process.

**Program of Study & Academic Credit**
For some majors, the Study Abroad Center works with departments to develop integrated semester options that are pre-approved to fit into your major. That said, it is always a good idea to save some free electives or general education requirements – as these are the easiest courses to find and take while abroad.

**Plan Ahead**
Start researching study abroad early so you have the most options available to you. Keep in mind that there are thousands of programs to choose from, so a thorough search will take time.
DETAILED PROCESS FOR STUDY ABROAD

Study Abroad can be one of the most rewarding experiences in a student’s college career. Students are not limited to the programs provided in this guide. No matter which program you select, we encourage you to research and identify a program that best meets your individual goals. Below is a detailed description of the process for studying abroad while at York College.

PHASE 1: DETERMINE GOALS AND FEASIBILITY

This is a critical step that requires self-assessment. It’s easy to want to study abroad for superficial reasons; however, deeper reflection about your motivations will result in a more comprehensive study abroad experience and greater personal and academic rewards.

*Step 1: Why do you want to go?*

The first step is to determine and understand your goals and motivations to study abroad. Some possible goals include: improve language skills, learn about another culture, enhance your education, gain an experience not available at home campus, take unique courses toward your major/minor, etc. Keep in mind that you will likely have a number of goals, and each of them will have levels or choices involved.

*Step 2: How will study abroad fit into your academic plan/program?*

Knowing exactly where you are in your academic program and having a roadmap through graduation is an essential step in the study abroad process because the courses you take abroad will need to transfer back to your York College transcript. Only once you have developed this plan will you be able to determine the feasibility and timing of study abroad for you.

Will you be able to fulfill general education, major, or minor requirements while abroad, or will the credits go toward free electives? Each student will be at a different place in their program requirements based upon their major/minor as well as the courses they have already completed. Complete a CAPP Degree Evaluation (through portal, YCPWeb, under Student Services, Student Records) to verify academic program requirements. Once you have mapped this out, meet with your academic advisor to verify your plan and discuss any questions that arise during the process.

*Step 3: When will you go?*

Based upon the previous step, you can determine if going abroad will alter your graduation plans, or if you can select a program and time frame that fits with your current graduation date. This is an important factor that should consider the type of experience most appropriate for one’s goals, needs, and interest. Programs vary by length of time, credits earned, and amount of cultural immersion. *It is possible to participate in more than one of these experiences during your time at York College.*

- **Short-Term Opportunities:** There are York College Courses with a Short-Term Study Abroad Component, as well as independent short-term programs. A Faculty-led Short-Term Program combines coursework with international travel. These courses may be offered during minimester, a summer session, or during the fall/spring semester; the international travel component varies from 1-3 weeks.

- **Summer Programs:** Take 1-3 courses while living abroad and transfer the credits back to York College. Programs range from 4-6 weeks in duration.

- **Semester Programs:** Spend a full semester studying and living abroad, then transfer credits back to York College.

- **Full Year Programs:** Spend a full academic year abroad, then transfer credits back to York College.
**PHASE 2: RESEARCH POTENTIAL PROGRAMS**

**Step 1: Where**
Once you have determined your primary goals and the program length, it’s time to identify the best program for you.

There are thousands of study abroad programs, and you need to determine which one meets your needs most effectively. You’ll want to learn more about the countries you are considering, and in many case expand your research to cities within each country to identify locations that will complement your goals. Sources include:
- AAA tour books, travel guides and travel websites
- US State Department information and travel advisories ([http://travel.state.gov](http://travel.state.gov))

**Step 2: What Program**
Most program websites include course listings that will enable you to see courses typically offered and begin to determine how they would transfer back to York College and your academic program requirements. Other resources to research programs:
- Studyabroad.com
- Study Abroad Surveys from past participants (in Study Abroad Center)
- Fall Semester Global Education Fair & Study Abroad Information Sessions

**Step 3: Costs**
Don’t forget to consider and compare program costs as well as the resources, services, and staff they provide. Fall and Spring programs allow you to utilize your federal and state financial aid. Summer programs are considered out-of-pocket expenses, but tend to be priced lower due to the shorter time frame and number of credits received. York College institutional aid (scholarships & grants) only applies toward a few programs. Please contact Financial Aid to discuss your specific circumstances.

**PHASE 3: APPROVAL FOR ACADEMIC CREDIT**

*You may apply to your study abroad program before completing your approval for academic credit, but we recommend checking course offerings beforehand, especially in cases where there may be an application fee.*

**Step 1: Request for Off-Campus Study Approval Form**
Obtain a [Request for Off-Campus Study Approval Form](http://www.ycp.edu/media/york-website/registrar/request_for_offcampus.pdf) (available through Registrar’s Office website). Based on the program you’ve chosen, review possible coursework abroad and write down those you’re interested in either on the form or a separate sheet (including the necessary information). We recommend listing more courses than planned in case of placement or space issues. If you do not plan to have this program count for academic credit, please still meet with your advisor to determine how it fits in your program of study.

**Step 2: Meet with Advisor**
With the form, meet with your academic advisor to discuss your plan and connect those courses to your York College requirements. By running a CAPP Degree Evaluation, you and your advisor can see which courses are still needed for your degree, along with open electives and general education requirements that study abroad courses may count toward.

**Step 3: Meet with Registrar’s Office**
Once you and your advisor have agreed, make an appointment to submit the form to the Registrar’s Office. The Registrar’s Office will officially evaluate the transfer credits for York College, and your completion of the form will confirm this process. This form is meant to ensure that your will receive transfer credits (TR) for your courses abroad so long as you meet the conditions outlined in the Request for Off-Campus Study Approval Form. Please note that study abroad counts toward your **Final 30 Credit Residency Requirement** (it will be allowed in the final 30 credits).
PHASE 4: APPLY

Once you have determined the appropriate program for you, how the credits will apply to your York College program, and are comfortable with the costs, you need to follow the application process specified by the program.

PHASE 5: YORK COLLEGE REQUIREMENTS

- Complete Request for Off-Campus Study Approval Form and make an appointment with the Registrar’s Office to submit it and discuss registration.
- Pay the $100 Study Abroad Fee to the Business Office (The above are required for all Study Abroad except York College Short-Term Study Abroad Courses)
- If program is directly affiliated with York College, you will receive an email with additional forms required by the College prior to your departure.
- Upon return, request your transcripts be sent to the Registrar’s Office:
  Registrar’s Office
  York College of Pennsylvania
  441 Country Club Road
  York, PA 17403
  USA

PHASE 6: PREPARATION

- **Passport.** Obtain passport (allow for minimum 8-12 weeks processing time). Consider having at least one other family member obtain a passport in case of emergency.
- **Visa.** Research visa or other related requirements (set by the country in which you will be studying).
- **Health and Safety.** Read Health and Safety Guidelines very carefully to know your responsibility and liability. Check health insurance for international coverage (supplemental insurance coverage is usually required by sponsoring institution). Obtain appropriate supplies of prescription medication, as needed.
- **Travel Arrangements.** Make flight and other travel arrangements either on your own or through a travel agent (some specialize in student foreign travel). Begin 4-6 months in advance of departure.
- **Paperwork.** Complete the appropriate paperwork and forms required by your study abroad program. Make multiple copies (at least 5 each) of passport, student photo ID, credit cards, etc. Consider purchasing an international student ID & discount card. There are a number of options that provide travel insurance, discounts, and other benefits.
- **Packing.** Read packing guidelines and recommendations for your program.
- **Research.** Read all you can about the country/region, history and culture where you will be studying. As needed, obtain compact/travel guides and language (e-)books.
- **YCP Contact.** Keep in touch with YCP Associate Registrar and Residence Life Office while abroad for course selection and housing for your next semester at York College.
- **State Department Registration.** We strongly recommend you register your travel plans by enrolling in the Department of State’s Smart Traveler Enrollment Program (STEP: [https://step.state.gov/step/](https://step.state.gov/step/)). STEP enrollment gives you the latest security updates and makes it easier for the U.S. embassy or nearest U.S. consulate to contact you in an emergency.
- **Prepare, prepare, prepare.** Pay attention to deadlines and details.
STUDY ABROAD ELIGIBILITY & TRAVEL POLICIES

The following policies are in accordance with the Education Abroad Standards of Good Practice and address the standard of conduct by which those representing York College abroad should meet.

- **RESIDENCY REQUIREMENT** – All study abroad programs approved by the College fall within the Residency Requirement necessary for a student’s degree requirement and will be accepted as part of the final 30 credit hours of a student’s coursework.

- **MINIMUM GPA POLICY** – York College requires that all students studying abroad have at least a 2.5 GPA AND meet the minimum GPA required by the specific study abroad program. There may be an appeal to the Provost on this policy.

- **JUDICIAL STANDING/SANCTION POLICY** - Participation in a study abroad program includes demonstrating an ability to abide by York College’s standards, values, and expectations as outlined in the Student Code of Conduct. The Study Abroad Center requests conduct history information from Residence Life/Student Conduct Office prior to approving a study abroad application. Students with the following sanctions are not cleared for study abroad programs:
  
  - Students who are on disciplinary probation or suspension, subsequently students who are placed on probation or suspension before program or course departure will have their clearance revoked.
  - Students with outstanding or overdue sanctions.

  Based on the nature of an individual study abroad program, the cultural and legal expectations of the program country, the program size and staffing level, the Study Abroad Center may deny a study abroad application based on additional information provided by Residence Life/Student Conduct Office. This information includes Student Code of Conduct violations related to assault, sexual misconduct, drugs, alcohol, and other misconduct of a highly disruptive nature.

- **STUDY ABROAD HEALTH INSURANCE POLICY** - York College requires that all students traveling abroad on a study abroad program run by York College or as part of an affiliation agreement with York College obtain health insurance for the duration of their study abroad. For Affiliated Programs, this may be a health insurance offered or recommended by the York Affiliated Institution. For programs run by York College, this may be included as part of the study abroad program fee.

- **TRAVEL WARNING POLICY** - York College considers the current travel warning levels from the Department of State and the Center for Disease Control (CDC) to determine if travel to a country is permitted. If a country has a Level 3 warning (or lower) from the Department of State Travel Warnings or the CDC’s Travel Health Warnings, then travel is permitted. If a faculty/staff/student group has planned for travel abroad and a Travel Warning is issued prior to departure, that travel must be cancelled, even if deposits have been paid. If an individual or group has departed prior to a Travel Warning, the individual or group must return to the United States as soon as possible. Programs that involve travel to multiple countries may continue after removing from the itinerary the country that is subject to the Travel Warning. The U.S. State Department website details Travel Warnings. And the Center for Disease Control website details Travel Health Notices. Organizers may make an appeal to the Provost in regard to this policy.

York College Short-Term Study Abroad Courses

Our faculty offer global expertise and perspectives across disciplines for a variety of short-term courses. We intentionally design these courses in such a way that they are often embedded into larger semester courses that allow not only a more in-depth look at the countries before and after travel, but deeper reflection and engagement. We work hard with our partners to ensure we not only maximize the academic experience, but keep in mind the cost of these once in a lifetime opportunities.

York College has a history of supporting non-credit study abroad opportunities and as a way for students to find international experiences that are not class-based, such as conferences, independent research, cultural connections, and performances. Below are a list of Delegate Opportunities in which our students have participated.

### United Nations Conference of the Parties (COP)

**Destination:** Glasgow, Scotland (Location changes each year)  
**Semester(s) Offered:** Fall (November)  
**Expected Travel Time:** 10 days  
**Contact:** Dr. Greg Foy, gfoy@ycp.edu

Each year, York College sends one student with our faculty to the UN Climate Change Conference. The student is usually drawn from Chemistry or Forensic Chemistry majors. While fall 2019 will be in Santiago, students have attended the past 9 conferences (Cancun, Durban, Doha, Warsaw, Lima, Paris, Marrakesh, Bonn, and Katowice).

### World Performance

**Destination:** Czech Republic, Hungary  
**Semester(s) Offered:** Summer  
**Expected Travel Time:** Summer 2023  
**Contact:** Dr. Grace Muzzo, gmuzzo@ycp.edu

Every other year, our choral singers will have an international performance opportunity that allows students not only to perform, but also to attend the music festivals and visit other cultural sites. Although this is a non-credit study abroad opportunity, students are expected to enroll in Chorale here at York to take part in rehearsals for the performance. Our inaugural program went to Ireland for the Limerick Sings Choral Festival.

### Global Graham Scholars

**Destination:** Varies based on Student Group  
**Semester(s) Offered:** Varies based on Student Group  
**Expected Travel Time:** Varies based on Student Group  
**Contact:** Dr. Dominic DelliCarpini, dcarpini@ycp.edu

A unique part of the Graham Scholars program is the opportunity for student-driven international experiences. Graham Scholars receive a stipend and through group planning can choose a destination that fits the needs and majors of those students going. They identify York faculty or staff to accompany them and develop an intercultural program that works toward the goals of the group.

### Southwestern University of Finance and Economics (SWUFE) Summer Conference

**Destination:** Sichuan, China  
**Semester(s) Offered:** Summer (July)  
**Expected Travel Time:** 14 days  
**Contact:** TBD

We have had 2 students attend the Summer International Conference at the Southwestern University of Finance and Economic. Each year the conference addresses major trends and issues concerning Chinese commerce and global business. Not only that, but cultural activities are woven throughout for student ambassadors to truly engage while there.
### Birthright Israel

York College is committed to fostering vibrant and inclusive Jewish life here on campus with the support of the Doris and Bernard Gordon Center for Jewish Student Life. As part of their efforts they also help those students looking to reconnect with their roots by facilitating applications to Birthright Israel, which offers free trips to Israel to young Jewish adults.

### Independent Research Abroad

Faculty whose research you wish to join

We’ve had students work with faculty on independent research projects, and some can include research abroad. This past year one student spent a month in Nicaragua conducting research in the area on agrobiodiversity and working with local coffee farmers.
