

Psychiatric and Psychological Disabilities

Professionals conducting the assessment, rendering a diagnosis, and providing recommendations for reasonable accommodations must be qualified to do so (e.g., psychiatrist, clinical psychologist, clinical social worker, licensed counselor).

Documentation submitted in relation to a psychological disorder must state a student's current functional limitations, and may require periodic updates if there are changes in the student's functioning. The nature of the specific psychological disorder and its impact on the student should be reflected in the documentation submitted to SAS.

Submit a letter from your current treating mental health provider that includes:

- a statement of diagnosis
- description of symptoms/impact
- current treatment methods
- description of the impact of the diagnosis on your ability to function in the college environment
- any care provider recommendations for accommodations.

Also submit a copy of your most recent 504 Plan or IEP and most recent Evaluation/Re-Evaluation Report from high school, if applicable.
